

Avidbots™ Floor Pad Wear Chart

Fit for your Neo 26" or 32" Disc Cleaning Head models.

Red Buffer Pad

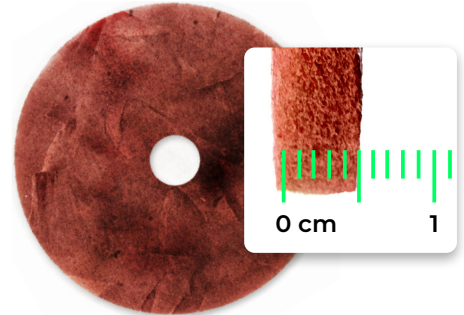

- ▶ 3M 5100 Red Buffer pads are designed for everyday cleaning and light scrubbing. Removes light soil, scuff marks and black heel marks.
- ▶ Categorized under the Greener Solutions standard, as the polyester fibre used to make them contain a minimum of 50% post-consumer recycled content.

When to Replace:

Pads should be replaced when any of these three things occurs:

- Once the pad tears
- Once the pad is worn to 5mm or less
- Once Neo instructs you to do so

Clean & Shine

- ▶ Scotch-Brite™ Clean & Shine pads increase shine with each use gradually approaching burnish-quality results without the extra step.
- ▶ Certified by Green Seal for Environmental Innovation based on design, to extend the useful life of the floor pad and reduce solid waste generation. Pads can be flipped over one time for additional use.

When to Replace:

Pads can be used on each side until the coating has been fully worn away revealing the yellow interior of the pad. After the first side has worn away flip pads. Discard after the second side has also worn away.

The Importance of Pad Replacement

Floor pads will get naturally thinner as the pad fibers break down with use and are collected by the vacuum. Eventually they will wear thin and must be replaced.

If you don't replace the pads often, the pad driver bristles will protrude through the pad and potentially cause damage to the flooring.

How To Clean:

Remove the pads and rinse with water to remove dust, dirt and debris.

Friendly Reminder:

We recommend having extra pads on hand for continuous cleaning operation.
