

# Avidbots Command Center: Fleet Management, Real-Time Monitoring & Remote Assistance

For data that transforms your  
cleaning operations.

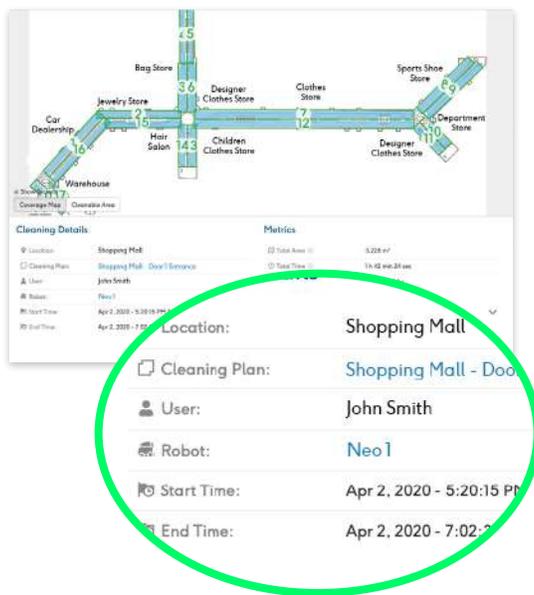

**Avidbots**<sup>®</sup>

## Avidbots Command Center: Web-Based Software to Manage Neo

The Neo autonomous floor cleaning robot solution provides you with a level of oversight and performance measurement that you won't find in other commercial floor scrubbers. The proprietary Avidbots Command Center lets you monitor, manage and track your Neo—or an entire fleet of Neos—remotely and in real-time.

You'll be able to access highly detailed reports of every cleaning operation, including precise productivity metrics and sector-level coverage maps. With the Neo floor scrubbing robot and supporting control center, you and your managers will always be in the know.

✓ Avidbots Command Center provides details such as identifying who used Neo and the start and end time of the cleaning.

## In-Depth Performance Reporting Meaningful Insights at Your Fingertips

You've never had so much insight into cleaning performance as you'll have with the Neo autonomous floor cleaning robot and Avidbots Command Center. Understand fleet performance at a glance with configurable cleaning targets to define success and transform data into meaningful insights, enabling you to optimize your cleaning operation over time.

Stay in the know by viewing productivity metrics, trend reports and visual ratings for each cleaning operation. Issues experienced while cleaning, such as areas or aisles skipped because they were blocked, will be highlighted on your cleaning report for easy review.

Generate in-depth performance reports and track the metrics that matter, including:

- Total area cleaned
- Total cleaning time
- Productivity
- Water consumption

The Avidbots Command Center provides you with the information needed to improve the effectiveness of your cleaning operation and boost ROI.

# Fleet Management

## Monitor Your Fleet Remotely

Keep tabs on your Neo autonomous floor cleaning robot—or an entire fleet of Neos—in real-time, directly from your home page. View the online status and location of your robots, as well as the success of each cleaning plan by robot and location.

### With the Avidbots Command Center Fleet Management you're able to:

Identify the percentage of successful cleaning plans executed by the entire fleet of Neos at any given time.

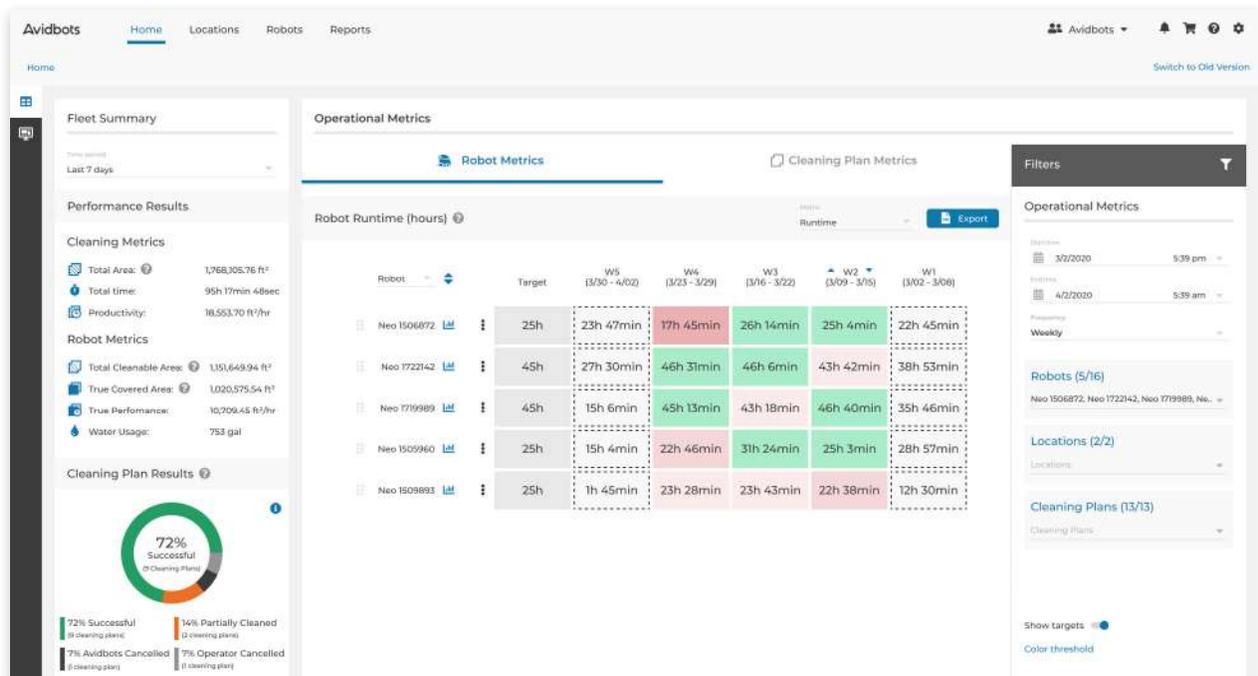

Pinpoint under-utilized Neos via customizable visual indicators.

Compare cleaning performance across all locations and then identify Neos in need of improvement.

Investigate any issues within specific cleaning runs at a high-level view with drill-down capabilities as needed.

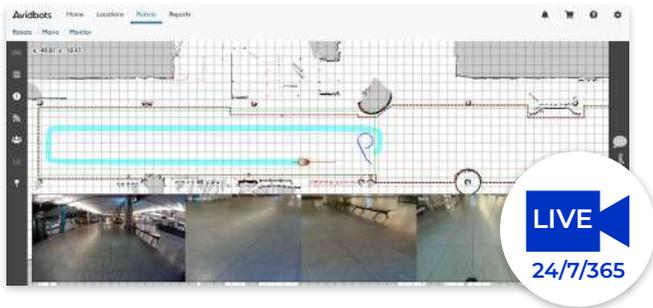

✓ Our user-friendly Fleet Dashboard takes a snapshot of your entire operations.

## Real-Time Monitoring

### Check In Anytime, Anywhere\*

View the online status and location of your Neo—or an entire fleet of Neos—at a high level or take a deep dive into each cleaning process with Avidbots Command Center: Real-Time Monitoring. Additionally, you can access real-time video of your Neo robots providing you with insight into the cleaning operation when you're away.

On the go? The Avidbots Command Center supports automated alerts to mobile devices for events such as cleaning completion and performance, required water changes, routine maintenance and other activities. With Avidbots Command Center, you'll never be in the dark about your cleaning operation.

 **Avidbots Command Center: 24/7/365 real-time video monitoring to keep you in the know.**

## Remote Assistance

### Avidbots Experts 24/7/365

While Neo's AI navigation leads the industry in adapting to highly dynamic environments, all robots will eventually get stuck when significant enough environmental changes or blockages occur. What happens then?

Avidbots' **Remote Assistance** service supports every Neo robot 24/7/365 with a dedicated Avidbots team, who are on stand-by for each cleaning operation around the world in real-time, tracking Neo as it cleans. Should an issue occur, our experts can remotely assist Neo in getting back on track using the onboard cameras. Additionally, our experts have the ability to investigate and often resolve stops.

## Neo vs Self-Driving Machines

If a manual cleaning machine with bolt-on autonomy is blocked and it cannot detour automatically, it will stop. Without a Remote Assistance service to intervene and help, the machine has no choice but to send emergency messages to your staff. Before it will start cleaning again, your staff must locate the machine and drive it manually around the object. Your staff has now been reduced to babysitting the machine as it semi-autonomously cleans your facility. You need a robot that will go and clean autonomously—on its own when you press “go”.

### | **The Avidbots Difference** It's Our Secret Sauce

Built from the ground up to be a robot, Neo is optimized for autonomous cleaning and sanitization. Combine that with Remote Assistance and Neo delivers a truly autonomous clean.

Neo is the smartest robot floor scrubber in the marketplace today and will revolutionize how you think about cleaning.

\*Note: Internet access required.

## Why Avidbots?

Buying an Avidbots Neo isn't just buying a floor scrubber. It's investing in a technological future that can redefine your cleaning function, making it more productive, more cost effective and easier to run. More importantly, our robotics and AI technology open up new opportunities to make your business even more successful. We realize this isn't just about buying a product, or a technology, or even a business proposition. You want to buy into a trusted partner who can take you into the future of automated operations using cutting edge robotics. At Avidbots, we work side-by-side with our customers to earn that trust and realize all the benefits that robotics can bring them.

## About Us

Avidbots is a robotics company with a vision to bring robotic solutions into everyday life to increase organizational productivity and to do that better than any other company in the world. Our groundbreaking product, the Neo autonomous floor scrubbing robot, is deployed around the world and trusted by leading facilities and building service companies. Headquartered in Kitchener, ON, Canada, Avidbots is offering comprehensive service and support to customers on 5 continents.
